

# HEMASEAL & CIDE™ Desensitizer

## TESTIMONIALS

"I am now everyday user of the Hemaseal & Cide; I was sold by the studies and articles on it. It seems like a logical step in my restorative routine."

**Martin Goldstein, DDS Wolcott, CT**

"I have used this desensitizer primarily for direct bonding procedures, and for crown preparations. It works as well as the better-known brands like Gluma, and at a third of the price, especially in the 10ml bulk bottle size. This by far offers the most value and cost efficiency of all desensitizers on the market."

**Brian Gray, DMD Washington, DC**

"I've used Gluma, but with Hemaseal & Cide, I feel there's less soft tissue irritation, and I like that studies show improvement in the long-term bond. I opt for the unit dose, I use it in my education courses and show it in my lectures."

**Bruce Crispin, DDS, MS Tarzana, CA**

"Hemaseal & Cide is a highly-effective agent in eliminating post-op sensitivity. In addition, it is extremely simple to use. Typically, Chlorhexidine enhances shear bond strength."

**Karl Leinfelder, DDS, MS Chapel Hill, NC**

"I've tried Gluma, and all the other products. Hemaseal & Cide sets a new standard for elimination of bonding sensitivity. I also like the stronger bond it gives."

**Anthony Vocaturo, DDS Bayonne, NJ**

"In clinical situations that call for maximum disinfection and desensitization, I reach for Hemaseal & Cide."

**Michael DiTolla, DDS, FAGD Newport Beach, CA**

"I use Hemaseal & Cide primarily for direct bonding procedures, and have had NO sensitivity nor other problems. The bulk bottle is easy-to-use, and I get the results I need. I can recommend it whole-heartedly."

**Troy Schmedding, DDS, AAACD Walnut Creek, CA**

"It is a common problem: Patients have pain after a restoration or crown because the dentin tubules were neither disinfected nor properly wetted, sealed, and bonded. You redo the work at no charge, yet they speak negatively about the experience."

Well, Advantage Dental has a solution for you! Use Hemaseal & Cide for total elimination of postoperative sensitivity.

**Joseph A Blaes, DDS, Fenton, MO**

"I like products that are easy-to-use, and better for the patient, like my old friend Hemaseal & Cide. In one bottle, it brings you a terrific antimicrobial desensitizing agent and a great cleansing agent. The studies I have read demonstrate its superior short and long-term bond strength-compared to 8 other desensitizers, and reduces micro-leakage; all this at a fraction of the cost of Gluma, You just might call Hemaseal & Cide the Under-Armor for under all your restorations, both comp-osites and crowns for ultimate protection."

**Howard Glazer, DDS, FAGD Fort Lee, NJ**
